## Welcome to the 8<sup>th</sup> Hybrid AF Therapies Summit

It is our pleasure to welcome you to the 8<sup>th</sup> Hybrid AF Therapies Summit at the Radisson Blu Hotel in London, UK.

The summit represents a fantastic opportunity to actively participate in a highly focused, multi-disciplinary event dedicated to contemporary and emerging approaches to treating your patients with arrhythmias.

The interest in Hybrid AF Therapies is growing. There is increasing evidence that the Hybrid procedure, by combining epicardial and endocardial ablation techniques, represents a robust solution in addressing unmet clinical needs in arrhythmia treatment, from advanced forms of atrial fibrillation (AF) to inappropriate sinus tachycardia. The major cardiac societies, globally, are reflecting the acceptance of Hybrid AF Therapies in their recent treatment guidelines. Every day, more and more cardiac surgeons,

electrophysiologists and cardiologists are partnering together to offer their patients the most diverse and complete range of therapeutic options.

AtriCure is proud to facilitate this event. You will have the opportunity to hear from an international faculty, exchange your experiences and engage in meaningful discussions with your peers to further advance Hybrid AF Therapies development and offer your patients effective treatment options.

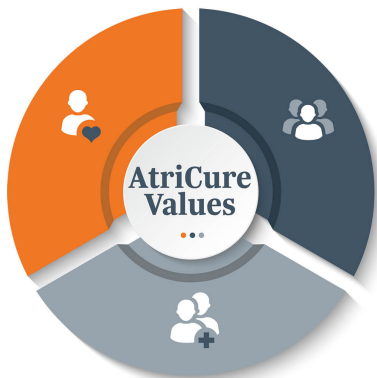

Our team is honored to support this worldclass event which aligns directly with our mission: At AtriCure we are passionately focused on reducing the global atrial fibrillation epidemic and healing the lives of those affected by complex arrhythmias and pain after surgery.

Enjoy the Summit!
